Bureau of Labor Statistics: How Americans Spend Their Time and Money

Help! I'm an Accidental Gov Docs Librarian

Mary G. Scanlon

Wake Forest University

Agenda

Content:

- Consumer spending
- Household characteristics
- Consumer time use

Navigation:

- Find and retrieve data
- Download data

Learning Outcomes

- Master definitions of select BLS terms
- Grasp scope of consumer data available at BLS
- Be able to navigate to consumer data, access data tables and download to Excel

So What?

CEX is the only Federal source for consumers' expenditures and incomes, as well as the characteristics of those consumers.

ECONOMY

U.S. Consumers Cut Spending for First Time Since January

Move Raises Doubts About Sustainability of Summer's Economic Growth

Consumer Expenditures

Contents

The buying habits of American consumers including data on:

- Income
- Expenditures
- Consumer unit (families and single consumers) characteristics

Consumer Expenditures

Methodology

Data sources:

- Two surveys:
 - the Quarterly Interview Survey
 - the Diary Survey
- Collected for BLS by the U.S. Census Bureau
- Data are available back to 1984

Consumer Expenditures

Methodology, cont'd

- The Interview survey
 - Monthly out-of-pocket expenditures
 - Examples: housing, apparel, transportation, health care, insurance, and entertainment
- The Diary survey
 - Weekly expenditures of frequently purchased items
 - Examples: food and beverages, tobacco, personal care products, and nonprescription drugs and supplies

Consumer Expenditures

Methodology, cont'd

- US non-institutionalized population
- 7,000 sample households
- Each survey has its own independent sample

Consumer Expenditures

Data availability:

- Annual
- Mid-year
- Multi-year

Consumer Expenditures Data Segmentation

- Age
- Composition
- Highest education level
- Hispanic or Latino origin
- Housing tenure
- Income before taxes
- Number of earners
- Population size of area
- Quintiles of income
- Race
- Region
- Size of unit

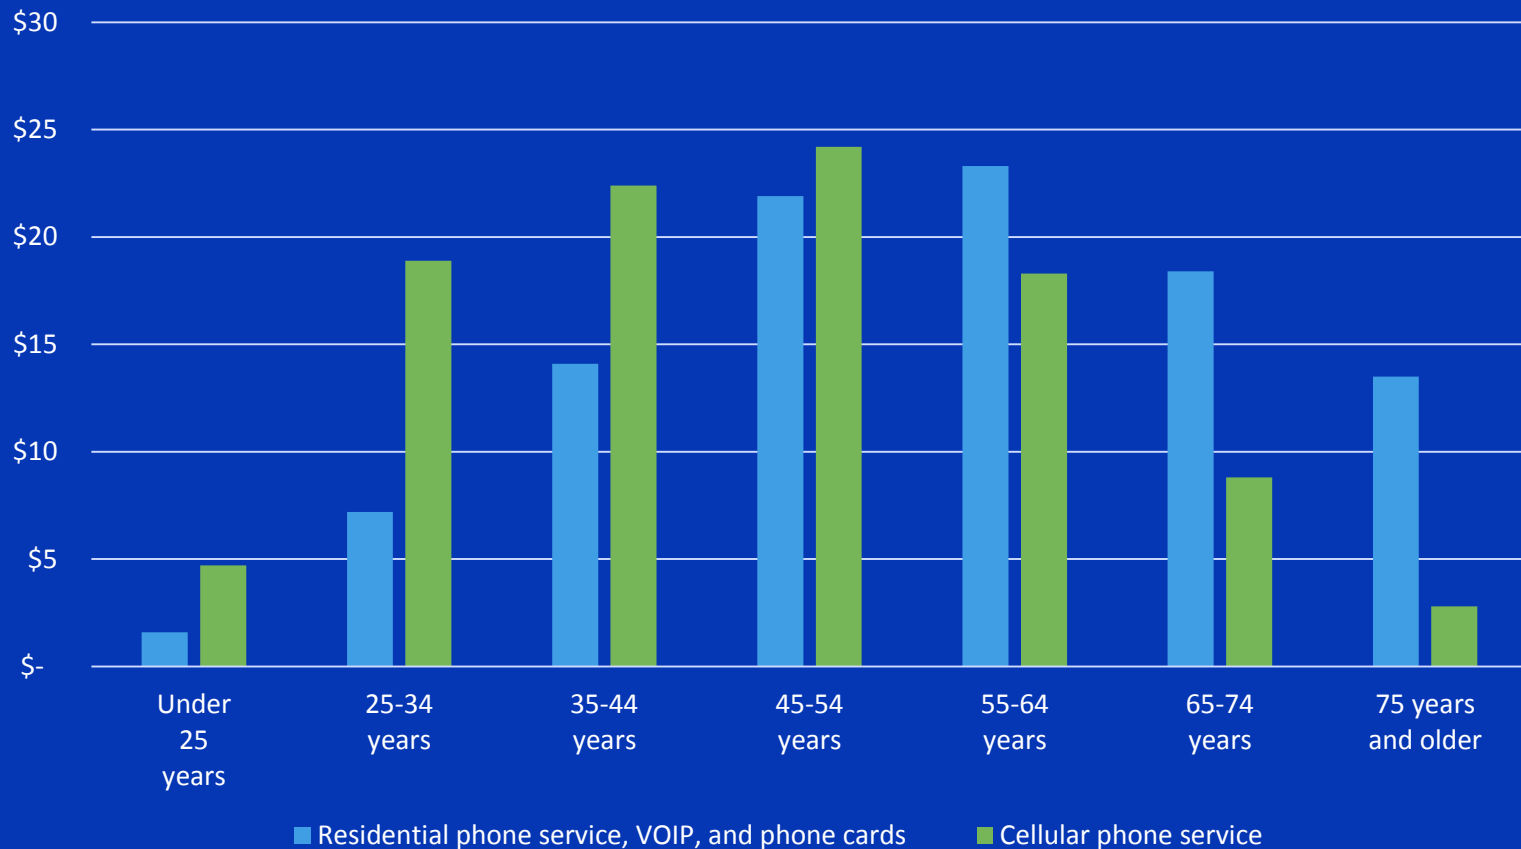

Consumer Expenditure Data

How Used?

- Measures the impact of policy changes on economic groups
- Sets thresholds for the Supplemental Poverty Measure
- Reveals consumers' spending habits and trends
- Determines the CPI market basket of goods and services and their relative importance

Annual Expenditure on Telephone Services by Age

(\$ Mil)

Shares of Home Ownership by HHI, 2013

How Do I Use CEX?

Establish a rough estimate of market opportunity.

Example:

Use Census data to determine number of people in the target market.

Use CEX data find this group's annual spending on the target category.

(No. of people) X (avg. annual spending) = market opportunity.

Consumer Expenditures

Questions about content?

American Time Use Survey (ATUS)

Measures the amount of time people spend doing various activities.

Examples:

- Paid work
- Childcare
- Volunteering
- Socializing

American Time Use Survey (ATUS)

Provides nationally representative estimates
of
how, where and with whom
Americans spend their time.

American Time Use Survey (ATUS)

It is the only federal survey providing data on a full range of nonmarket activities.

American Time Use Survey

Uses

- Economic Research
- Health and safety
- Family and work-life balance
- International comparisons

American Time Use Survey

Methodology

- Sponsored by the BLS, conducted by the U.S. Census Bureau
- Data are collected via phone interviews
- Respondents are interviewed only once

American Time Use Survey

Methodology, cont'd

Trained coders classify each activity according to the ATUS classification system

- 17 major time-use categories
- Each category has 2 additional levels of detail

American Time Use Survey

Methodology, cont'd

Who is asked to respond to the ATUS?

Households that have completed their final (8th) month of the Current Population Survey are eligible to complete the survey.

American Time Use Survey

ATUS Data availability

- Annually from 2003 – 2013
- For the following groups:
 - Civilian non-institutional population age 15 +
 - Employed persons
 - Married parents

Questions about ATUS?

AUG

08

Productivity grows 2.5% in 2nd quarter 2014 (annual rate); unit labor costs grow 0.6%

Productivity increased 2.5 percent in the nonfarm business sector in the second quarter of 2014; unit labor costs increased 0.6 percent (seasonally adjusted annual rates). In manufacturing, productivity increased 3.6 percent and unit labor costs decreased 1.3 percent.
